

Trip Name: Circler Lake to Mount Albert Edward.

Trip ATES Rating: Challenging.

Avalanche Forecast Region:	Vancouver Island
Local Name:	Mount Albert Edward via Jutland Ramparts.
Primary Use:	Ski Touring/Snow Shoeing, Mountaineering.
Access Point:	Paradise Meadows Trailhead
Egress Point:	Paradise Meadows Trailhead
Objective:	Albert Edward Summit
Objective Longitude	-125.43165
Objective Latitude	+49.67777
Description:	NOTE: this is not the summer route to Albert Edward. From Circler Lake it heads North West to Amphitheater Lake and up the ramparts of Jutland Mountain to the ridge between Jutland and Albert Edward and then on to the summit of Albert Edward.
Terrain Classification:	Challenging.
Below Treeline	15%
Treeline:	10%
Alpine:	75%
Other Resources:	Island Turns and Tours by Philip Stone.
Cautions	On the Jutland ramparts Limited chances to reduce exposure to avalanche tracks and runouts in terrain that can produce size 1-2 avalanches. On the ridge of Albert Edward the route must remain initially on the crest of the ridge to stay out of start zones to the East and off cornices to the west and then well away from the North side of the ridge where there is inevitably a massive cornice.
Mitigation opportunities:	Careful route finding on the Jutland ramparts to reduce exposure to avalanche terrain as much as possible. On Albert Edward staying on ridge crest where it narrows on it's north/south running section and then well to the south away from the huge cornice on it's east/west running section.
Recommended times for use	Not in times of Considerable or higher hazard at tree line and above.
Rescue and public safety information	BC Parks, RCC, RCMP.
